PORCH ENCLOSURE SYSTEMS

YOUR SPACE, TAKEN UP A NOTCH

Porch Enclosure Systems by SummerSpace® will transform your favorite space into a showplace! With screen and tempered glass options, you can add as much solar and insect control as you'd like, while keeping the view you love.

TOTAL TRANSFORMATION

Porch Enclosure Systems by SummerSpace® are a perfect way to add comfort to any covered porch or patio. Insects can't permeate our extra strength polyester screening, which is just dark enough to give a hint of privacy. These systems are a must have on any porch, veranda or patio area.

PORCH & PATIO

The beauty of **Porch Enclosure Systems by SummerSpace®** is that they conform to any space. Custom made to fit almost any size porch opening, these systems consist of panels made with powder coated aluminum framing, tempered glass, and durable screen. Designed to be as functional, compact and strong as possible, we've engineered significant performance into a slender panel design for a weatherproof room that will endure for years. Panels connect securely for a quick and efficient installation.

SummerSpace Porch Enclosures allow you to turn your open porch into a retreat that's free of insects, with a perfect hint of privacy that comes from our extra strength polyester screening. Use your porch as a bug free screen room in summer months. As the weather or seasons change, slide your tempered glass windows closed for a weatherproof room that can be enjoyed during cooler times of the year.

PANELS WITH MAIN GLASS SLIDERS AND 36" TEMPERED GLASS BASE

PORCH BEFORE PANEL INSTALLATION

These panels made a dramatic difference on this porch, turning it into living space that can be enjoyed all year. The sliding panes can be removed easily for a screen room in warmer months.

SCREEN ONLY UPPER PANELS WITH MAIN TEMPERED GLASS SLIDERS REMOVED

A GRAND WELCOME

SummerSpace® porch panels turned this farmer's porch into a king's castle. Our 9-foot center sliding door covers the wide entry way, while our panels perfectly enclose this expansive porch.

SUMMERSHIELD™

All powder coatings and applications are not created equal. Our industry leading pretreatment, and proprietary SummerShield powder coating finish, exceeds AAMA 2604 specifications including 3,000 hour salt spray testing. This super durable finish includes UV inhibitors that extend the life of the beautiful, fade resistant finish. Choose from twelve low gloss, lightly textured finishes. SummerShield takes it one step further by infusing our coatings with anti-microbial technology for the ultimate in low maintenance finishes.

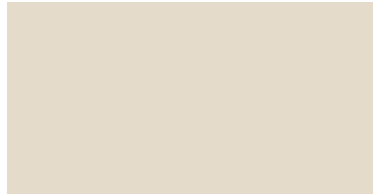

ALMOND POWDER COATING FINISH BEING APPLIED TO OUR ALUMINUM EXTRUSION.

We coat our own frame parts and extrusions in our 31,000 s.f. SummerSpace® powder coating facility. Our 800-foot continuous powder coat line allows us to wash, paint and heat-dry all parts to a perfect finish in under 3 hours!

Color swatches shown here may vary from actual materials. Contact your SummerSpace® dealer for powder coat swatch samples.

ANATOMY OF A PANEL

1
TOP VENT SLIDERS
 Optional top vent tempered glass slider windows allow you to control room air ventilation.

2
SLENDER DESIGN
 Durable components allow for a thin overall panel depth of 2 1/2".

3
CUSTOM CONTROL
 The handles on our window panes slide up and down effortlessly for personalized functionality.

4
INSECT CONTROL
 Our panels are made with an incredibly durable mesh screen to keep insects out of your space while adding a hint of privacy.

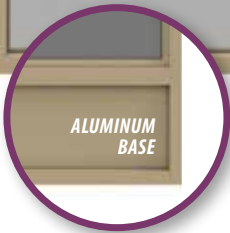

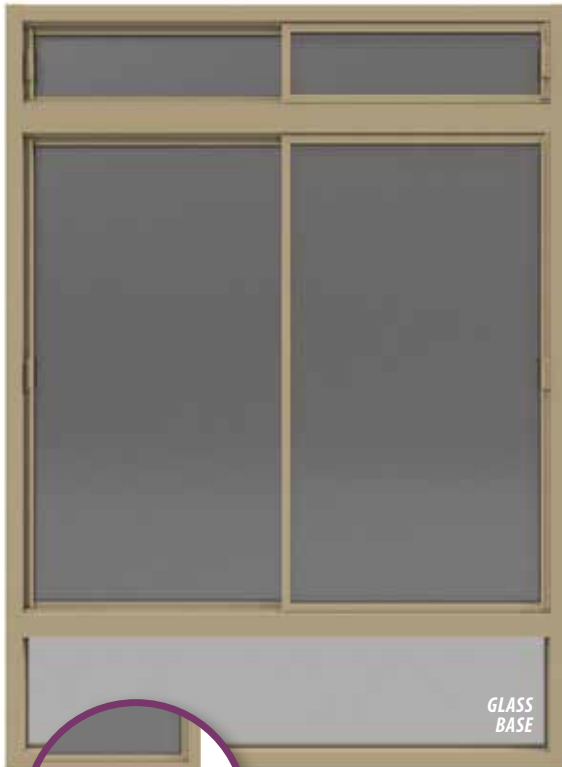

5
TEMPERED SAFETY GLASS
 Our i89 Low-E Tempered Safety Glass is high performance with clear appearance & high light transmission.

PANEL STYLE SELECTION GUIDE

WINDOW PANELS WITH TEMPERED GLASS

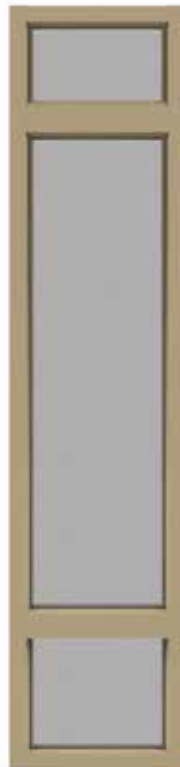

Window panels have a 24" minimum width and a 84" maximum width.

width: 14" - 24"

Sliding window panel with transom and base

Overall window panel heights including transom and base up to 120"
Details about individual section parameters can be found under the pictures to the right.

Narrow Matching Window Panels

Includes matching horizontal dividers with glass, aluminum or screen. All sections are fixed (non-operational) and not interchangeable from glass to screen.

Sliding window panel with transom

Overall window panel heights including transom up to 98"
Transom height with fixed glass 10" to 32"
Transom height with sliding glass 14" to 32"

Main sliding window panel only

Max. height: 66"

Sliding glass window and base

Overall window panel heights including base up to 102"
Base height with fixed glass 12" to 36"
Base height with sliding glass 14" to 36"

Notes: As a reference the panel shown above has an 18" base, a 66" window, and a 14" sliding glass transom. The use of a sliding glass transom is not recommended if the total height of the opening is less than 94", as it may interfere with your view.

When using a transom, it is recommended that it be used above all panels including the door(s) so the aesthetic appearance stays consistent and clean.

All sliding glass openings include a screen.

Base section available with fixed glass, aluminum or sliding glass with screen.

All window panels are available without any glass or aluminum as a screen only panel.

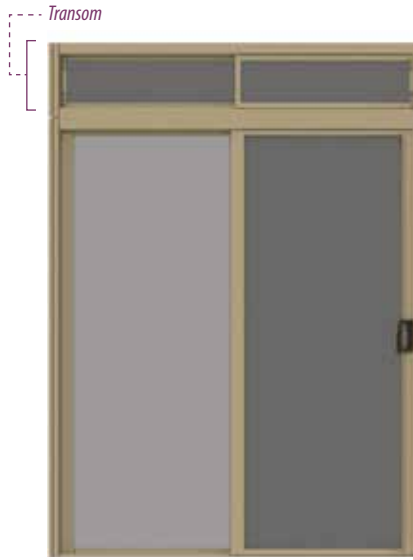

PANEL STYLE SELECTION GUIDE

DOOR PANELS WITH TEMPERED GLASS

Double Door Range	60" to 106"				
Overall Door Width	60"	72"	84"	96"	106"
Net Opening	24"	30"	36"	42"	47"

 Transom height with sliding glass 14" to 32"

Notes:

Doors with glass include sliding and stationary glass panels and one sliding screen door.
 Doors ordered with screen only include stationary screen panels and one sliding screen door.

PORCH & PATIO

EXTRUDED ALUMINUM

Aluminum extrusion is a process used to transform aluminum alloy into shapes with a definitive cross-sectional profile for a wide range of uses. The extrusion process takes advantage of the many benefits aluminum has to offer. Aluminum is a versatile, stable material for producing shapes ranging from simple to complex. Aluminum extrusions have many uses in commercial, architectural, industrial and building applications because of their strength and durability. Aluminum is uniform in quality when extruded and will never rust. It is affordable, corrosion-resistant, low maintenance, recyclable, and extremely strong. It is one of the many aspects of SummerSpace® Porch Enclosure Systems that assures its long-lasting durability.

TRIM KIT

Our two-piece aluminum powder coated trim is a seamless way to add that finishing touch. Available in two sizes our narrow width is 1 $\frac{3}{8}$ " to cover gaps up to $\frac{3}{4}$ " and a wider 1 $\frac{7}{8}$ " to cover gaps up to 1 $\frac{1}{4}$ ". This unique two-part trim design attaches easily to the panel with an easy snap on cap to hide the screws. With a beautiful panel matching low gloss finish, this trim can be used inside, outside, or both. We also offer Geocell Phantom translucent sealant that takes on the panel color for a perfect finish weatherproof seal. Touch up paint bottles with mini brush or slim touch up pens are also available for that occasional scratch or nick.

TOUCH-UP PAINT

Available in all frame colors!

We recommend one bottle or pen of touch-up paint per project.

Perfect
Our color matched touch-up paints and se

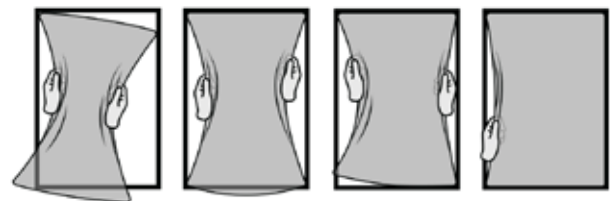

EASY TO REMOVE SASHES

For the days when the air is warm and the breeze is refreshing, you may want to simply have a screen enclosure for your porch. SummerSpace window panes are easy to remove and reinsert with minimal effort, allowing you to customize your comfort as the weather changes. To remove your panes, simply lift upward and slide out from the bottom. To reinsert, lift upward so the pane slides into the groove and allow it to slide down into place.

FLEXSCREEN®

SummerSpace® Porch Enclosure Systems are made exclusively with FlexScreen®. Created using flexible spring steel coated in exterior-grade PVC, the FlexScreen frame is nearly indestructible, scratch-resistant, and impervious to weather extremes. Held firmly in place by tension, the frame disappears into the screen pocket for an unobstructed view. And FlexScreen installs and removes in seconds for easy cleaning. We're proud to offer this premium, hassle-free product on our popular SummerSpace® Porch Enclosure Systems!

SEALANT/CAULKING

Designed to match your frame!

We recommend one tube of matching sealant for every two or three panels.

detail.

plants give a seamless finishing touch.
